

## **Radiology Technician (RT), Grand Junction CO**

### **DECA Health has an exciting career opportunity for a Radiology Technician (RT) to support the Colorado Injury & Pain Specialist in Grand Junction, CO.**

As a key member of the procedure team, the Radiology Technician provides fluoroscopy to physicians during procedures, maintains the safety of all employees in the procedure rooms, assists in direct patient care, and performs monthly Continuous Quality Improvement (CQI) monitors on equipment and staff. The Radiology Technician is responsible for providing direct care, according to the guidelines established by the Medical Director and Program Director, to all patients in the procedure phase of the visit, and maintaining a thorough knowledge of Radiation Safety and use of the fluoroscope. If you're highly motivated and enjoy a fast-paced environment, please submit your resume for further consideration.

Monday - Friday, 7:45 am - 5:00 pm, varying.

#### **Core Responsibilities:**

- Performs fluoroscopy during procedures in accordance with practice standards.
- Closely follows physician instructions, positioning patients correctly for the most efficient and safe patient outcomes.
- Protects the safety of all patients during X-ray procedures.
- Takes the proper precautions to protect themselves during radiation exposure on a daily basis.
- Applies administrative principles and management techniques in assessing, planning, leading, evaluating, delegating, and educating.
- Provides an array of patient care and procedural preparation, and assists with general end of day responsibilities.
- Demonstrates responsibility for continued professional growth, competence, and development.
- Actively participates in departmental program of Continuous Quality Improvement and other quality control activities.
- Complies with the Core Values, Mission and Philosophy of Surgical Center.
- Collaborates with other health care professionals in meeting departmental goals.
- Establishes and maintains mechanisms for communication and constructive problem solving with the staff.
- Utilizes a team approach in decision-making and problem solving.
- Builds trust and mutual respects. Supports and promotes decentralized model for decision-making.
- Performs all other duties as assigned.

#### **Required Education & Credentials:**

- Currently certified/licensed in the State of Colorado.
- Successful completion of an approved Radiology program.
- Valid BLS/CPR Certification

#### **Required Skills & Experience:**

- Demonstrated knowledge of Radiation Safety and use of the fluoroscope.
- Ability to input and retrieve information utilizing a computer and EHR software.
- Ability to understand directions, effectively communicate and respond to inquiries.
- Demonstrated effective interpersonal skills.
